In this book, a scientist and dedicated film enthusiast discusses the portrayal of science in more than one hundred films, including science fiction, scientific biographies, and documentaries. Beginning with early films like Voyage to the Moon and Metropolis and concluding with more recent offerings like The Matrix, War of the Worlds, A Beautiful Mind, and An Inconvenient Truth, Sidney Perkowitz questions how much faith we can put into Hollywood's depiction of scientists and their work, how accurately these films capture scientific fact and theory, whether cataclysms like our collision with a comet can actually happen, and to what extent these films influence public opinion about science and the future. Bringing together history, scientific theory, and humorous observation, Hollywood Science features dozens of film stills and a list of the all-time best and worst science-fiction movies.

Endangering Science Fiction Film explores the ways in which science fiction film is a dangerous and endangering genre. The collection argues that science fiction's cinematic power rests in its ability to imagine ' Other ' worlds that challenge and disturb the lived conditions of the ' real ' world, as it is presently known to us. From classic films such as 2001: A Space Odyssey and Solaris to modern blockbusters including World War Z and Gravity, and directors from David Cronenberg to Alfonso Cuar ó n, contributors comment on the way science fiction film engages with dangerous encounters, liminal experiences, sublime aesthetics, and untethers space and time to question the very nature of human existence. With the analysis of a diverse range of films from Europe, Asia, North and South America, Endangering Science Fiction Film offers a uniquely interdisciplinary view of the evolving and dangerous sentiments and sensibility of this genre.

Ever since motion pictures first landed on screen, there have been many key questions that the studios and movie watchers have tried to answer. What makes a movie an Oscar winner? How does one movie become a hit and another movie flop? Why do some films earn critical acclaim while other films become critical turkeys or bombs? How do audiences perceive film? What makes a movie resonate with a viewer? Are we unduly influenced by negative behaviors on screen? These questions have spurred debates, discussions, and many theories. Until the last two decades, however, it was quite rare to have the issues approached from a scientific viewpoint. The Social Science of Cinema compiles research from such varied disciplines as psychology, economics, sociology, business, and communications to find the best empirical research being done on the movies, based on perspectives that many filmgoers have never considered. Essays explore such topics as the specific factors that influence whether

movies make money, win awards, or flop; how our personality impacts on our viewing preferences; issues of gender inequity on screen; the relationship between visual perception and the way movies are edited; and many more. This book attempts the ultimate act of figuring out the mystery behind the movies - what makes them so memorable to us, what makes them this century's leading works of art, and how this art intersects with the business of making money.
