Another mad-cap adventure awaits Detan and his ne'er do well companions in this delightful steampunk mash-up with all the trappings of a heist caper As the city that produces the most selium—that precious gas that elevates airships and powers strange magic—Hond Steading is a jewel worth stealing. To shore up the city's defenses, Detan promises his aunt that he'll recover Nouli, the infamous engineer who built the century gates that protect the imperial capital of Valathea. But Nouli is imprisoned on the Remnant Isles, an impervious island prison run by the empire, and it's Detan's fault. Detan doesn't dare approach Nouli himself, so his companions volunteer to get themselves locked up to make contact with Nouli and convince him to help. Now Detan has to break them all out of prison, and he's going to need the help of a half-mad doppel to do it.

Fashion designers are presented with a range of methods and concepts for pattern cutting are presented, the main body of these methods, both traditional and contemporary, is predominately based on a theoretical approximation of the body that is derived from horizontal and vertical measurements of the body in an upright position: the tailoring matrix. As a consequence, there is a lack of interactive and dynamic qualities in methods connected to this paradigm of garment construction, from both expressional and functional perspectives. This work proposes and explores an alternative paradigm for pattern cutting that includes a new theoretical approximation of the body as well as a more kinetic method for garment construction that, unlike the prevalent theory and its related methods, takes as its point of origin the interaction between the anisotropic fabric and the biomechanical structure of the body. As such, the research conducted here is basic research, aiming to identify fundamental principles for garment construction. Based on some key principles found in the works of Geneviève Sevin-Doering and in pre-tailoring methods for constructing garments, the proposed theory for – and method of – garment construction was developed through concrete experiments by cutting and draping fabrics on live models. Instead of a static matrix of a non-moving body, the result is a kinetic construction theory of the body that is comprised of balance directions and key biomechanical points, along with an alternative draping method for dressmaking. This methodology challenges the fundamental relationship between dress, garment

construction, and the body, working from the body outward, as opposed to the methods that are based on the prevalent paradigm of the tailoring matrix, which work from the outside toward the body. This alternative theory for understanding the body and the proposed method of working allows for diverse expressions and enhanced functional possibilities in dress.

Follow Wendy Ward's tutorials to make a capsule wardrobe of 20 classic garments, suitable for any body regardless of gender, age, or body shape. Wendy's style is functional but beautiful basics, and you will learn the skills to make clothes out of both woven and knitted fabrics that are a joy to wear. There are five styles of button-down shirts, sweatshirts, and t-shirts, and three different styles of trousers, jackets, and jumpsuits, all made in versatile fabrics that can be dressed up or down. These are core basics that you'll turn to time and again and all these garments can be worn by any body, regardless of gender, age, and body shape. Suitable for both beginners and more experienced dressmakers, each project has multiple versions from easy to more technically challenging. Plus, there is a comprehensive techniques section covering everything from sewing a fly zipper to making a traditional shirt collar, alongside the fundamentals such as different seam and hem finishes. Patterns for the five basic garments and all the variations to make 20 different designs are included in the book on three pull-out, full-scale, multi-sized pattern sheets. Each pattern covers 10 sizes and there's no need for downloading or scaling-up patterns, just trace off the pieces that you need and off you go!

Relationships can be tricky when there is a certain dynamic of power shifted in one person's favor. Nika owns a two-family flat in the Ville neighborhood and rents her bottom apartment to Usian, who grew up in the area. Their relationship is one of mutual respect and understanding, but they always butt heads, which is what contributed to the uptight personality that Nika always displays. Usian is much older than Nika and thinks she's an entitled brat, while Nika thinks that Usian is a hood rat that will eventually end up back in prison. Amanika, aka Nika, has her entire life ahead of her, but for some reason, she can't figure it out. She went to college and graduated with honors from Washington University, with a degree in education; however, that's not really what she wants to do. Since Nika was a teenager, she worked at her aunt's African hair braiding shop, where all of

her family works. They've been applying pressure for Nika to get married, and before her father died, he arranged her to be wed. She wants to be able to pick the man she marries, and her mother doesn't seem to have a problem with it because she wants her daughter to be happy. However, the elders in the family are against it, and with her mother being Muslim, it makes things even more complicated. Jasper Simpson Jr., aka Usian Shakur, is an ex-convict trying to keep his life on track. He used to be a big-time drug dealer until he was locked up and served ten years in prison for drug trafficking and money laundering. He chose not to go back to the life, but a lot of his friends are still deeply involved and trying to get Usian to get back into the game. He found Islam while he was locked up and changed his way of living to better his life, but living in a neighborhood where drugs and violence dominate, there's a fine line between doing the right thing and succumbing to the pressures of your environment.

Sewing patterns have been the principle blueprint for making garments in the home for centuries. From their origins in the tailoring manuals of the 16th century to the widely produced pamphlets of the 18th and 19th centuries, through to the full size packet patterns of today, their history and development has reflected major changes in technology (such as the advent of the sewing machine), retailing and marketing practices (the fashion periodical), and shifts in social and cultural influences. This accessible book explores this history, outlining innovations in patternmaking by the companies who produced patterns and how these reflected the fashions and demands of the market. Showcasing beautiful illustrations from original pattern pamphlets, packets and ads, as well as 9 complete patterns from which readers can reproduce vintage garments of different eras, the book provides a unique visual guide to homemade fashions as well as essential exploration of the industry that produced them.
