IT IS 1979 - the dawning of a new, exciting decade. On the cusp of the eighties, the path of unlimited possibilities is laid at the feet of a young man by the name of Steven. Fresh into adulthood and poised to embark on a wild, new direction, he takes a bartending course in the throbbing metropolis of Montréal. In a politically-charged region of Canada that is constantly on the verge of separating from the rest of the country, he sets a solid foundation for what will become a rich career in Hospitality. Upon entering this demanding but rewarding vocation, he thrives and excels-and, unbeknownst to him, will be catapulted to as-of-yet unimagined vistas. With the soul of a nomad and a heart of an adventurer, he mixes drinks, observes human behaviour, and masters the subtle arts of taste and presentation. Refining his skills, he travels throughout his country, weathering terrain and demanding positions anywhere between Quebec and British Columbia. Expanding his horizons, he explores the United States, Europe, Asia, the Caribbean, and the Mediterranean. Whether on land or sea, he serves celebrities, wealthy travellers, and fellow nomads from all walks of life. Tasting both the bitter and the sweet along the way, he rides the ebb and flow of the vibrant eighties and the turbulent nineties. Observing the changing world around him while contemplating the shifting landscape within, he evolves as a highly-qualified Sommelier and Maitre'd, making a home wherever he lays his cocktail shaker and strainer. Whether mixing a Pina Colada in Dorval, serving beer to Prince Philip in Switzerland, or enlisting in the Navy in Halifax, the question remains: Where will the insistent call to his heart's true home finally lead?...

[The Easy Guide to OSCEs for Final Year Medical Students](#) American Bar Association

This edition covers all aspects of the subject needed by medical students. It is a volume in the *Illustrated Colour Text* series, with the subject matter divided into double-page spreads; this makes the information very accessible to the reader. Full use is made of flow charts and other graphics; clinical "boxes;" summary points; case histories; and clinical photographs. The whole orientation of the book is to concentrate on how clinical biochemistry relates to the care of the patient and to ensure that the medical student understands how to interpret laboratory. Covers clinical biochemistry from the point of view of the clinician using the diagnostic service Presents topics in easily accessible two-page spreads Includes mini case histories, key point boxes, flowcharts, and summary points Well illustrated with four-color drawings and clinical photographs New appendix added of annotated web resources for students to take further many of the topics covered in the book. To reflect the difficulties people have sometimes in analyzing hyper- and hypo-kalaemia, the existing spread is split into two - one spread on hyperkalaemia and another on hypokalaemia. The spread on hypertension will be revised and updated to reflect the fact that biochemistry is used as much or more in guiding treatment as it is in screening for secondary hypertension. Spreads on Myocardial Infarction, Cancer and Tumour Markers will all substantially revised and updated.
