This book: “ Concepts and Applications in Veterinary Toxicology: An Interactive Guide ” : covers a broad spectrum of topics related to students specializing in veterinary toxicology and for veterinary medical practitioners. Since the major emphasis of the book is to teach veterinary students, therefore more attention has been given to common toxicants to which several species are exposed including pet animals. The subject of veterinary toxicology is complicated greatly by the wide variations in responses of domestic, companion, aquatic, wild, and zoo species to toxicants. Therefore, emphasis has also been given to species variation and diagnostic toxicology including clinical management that is more relevant to veterinary profession. Key Features . Highlights specialized topics essential for veterinary specialists. . Covers a variety of common toxicants to which several species including pet animals are exposed. . Includes sample questions and answers that are extremely valuable for students, clinical pharmacists, teachers, and academicians in

preparing for their board and other examinations. An Introduction to Medicinal Chemistry Mosby Effectively merge basic science and clinical skills with Elsevier's Integrated Review Pharmacology, by Mark Kester, PhD, Kelly Dowhower Karpa, PhD, RPh, and Kent E. Vrana, PhD. This concise, high-yield title in the popular Integrated Series focuses on the core knowledge in pharmacology while linking that information to related concepts from other basic

science disciplines. Case-based questions at the end of each chapter enable you to gauge your mastery of the material, and a color-coded format allows you to quickly find the specific guidance you need. Online access via www.studentconsult.com is included with your purchase. This concise and user-friendly reference provides crucial guidance for the early years of medical training and USMLE preparation. Spend more time reviewing and less time searching thanks to an

extremely focused, "high-yield" presentation. Gauge your mastery of the material and build confidence with case-based, USMLE-style questions that provide effective chapter review and quick practice for your exams. Access to www.studentconsult.com where you'll find an interactive community center with a wealth of additional resources! Grasp and retain vital concepts more easily thanks to a color-coded format, succinct bulleted text, key

concept boxes, Top Five lists, and dynamic illustrations that facilitate learning in a highly visual approach. Effectively review for problem-based courses with the help of text boxes that help you clearly see the clinical relevance of the material.

Problem Solving Questions in Toxicology
Oxford University Press

Over 400 years ago, Swiss alchemist and physician Paracelsus (1493-1541) cited: "All substances

are poisons; there is none that is not a poison. The right dose differentiates a poison from a remedy." This is often condensed to: "The dose makes the poison." So, why are we overtly anxious about intoxications? In fact, poisons became a global problem with the industrial revolution. Pesticides, asbestos, occupational chemicals, air pollution, and heavy metal toxicity maintain high priority worldwide, especially in

developing countries. Children between 0 and 5 years old are the most vulnerable to both acute and chronic poisonings, while older adults suffer from the chronic effects of chemicals. This book aims to raise awareness about the challenges of poisons, to help clinicians understand current issues in toxicology.

Illustrated Toxicology
Oxford University Press
MCQs in Travel Medicine contains over 600 multiple choice questions

with detailed explanations which both teach and challenge the reader. In an easy-to-read format this book is ideal for practitioners in busy day-to-day practices and those preparing for examinations in travel medicine.

Best of Five MCQs for the Endocrinology and Diabetes

SCE JP Medical Ltd

An invaluable self-assessment tool for emergency medicine trainees in Australasia.

Emergency Medicine MCQs is an essential resource for

Australasia's emergency medicine trainees.

A practical self-assessment tool, the book assists trainees as they expand and refine their knowledge of emergency medicine, and will ultimately help them pass the Australasian Emergency Medicine Fellowship examination (FACEM). The

multiple-choice questions in Emergency Medicine MCQs cover both the core – and non-core areas in the Australasian Emergency Medicine

Fellowship. Using this text, trainees can revise alone or with their peers to identify the areas in which they need further development. The curriculum is divided into three main areas where trainees require expert level of knowledge, high level of knowledge and general level of knowledge. It covers important clinical problems encountered in everyday emergency medicine practice – from cardiovascular emergencies through to obstetric and

gynaecology emergencies, disaster management and toxicology. As well as being ideal for emergency medicine trainees qualifying through AECM, the book is a useful resource for GPs taking the GEM qualification through ACEM and JMOs 'on call'. Plus, this emergency medicine text is accompanied by an app – a separate product containing 180 randomised multiple-choice questions on all the topics within the book.

Medical Toxicology
Elsevier India

The book provides easy-to-understand diverse specialized topics in toxicology using self-study questions and answers. The answers are in the form of text along with custom made diagrams and explanations that help the student audience to understand and grasp the matter easily. Problem Solving Questions in Toxicology is written specifically as a study guide for the toxicology board and other examinations.

Best of Five MCQs for the Acute Medicine SCE Oxford University Press

Prepare with confidence for the Endocrinology and Diabetes Speciality

Certificate

Examination with this dedicated revision guide containing over 300 best of five questions covering the main themes of the curriculum.

The questions mirror the format that the candidates can expect to find in the exam and cover all of the key topics, including pituitary and hypothalamus gland, thyroid gland, bone disease, adrenal glands, diabetes, and lipid metabolism.

Explanatory answers include references to guidelines and

other sources to enable further reading and study. Providing a thorough assessment of the reader's endocrinological knowledge, this is the only revision book candidates will need to pass the Endocrinology and Diabetes Speciality Certification Examination first time.

Emergency Medicine MCQs

CRC Press
A single, comprehensive text covering all the MCQs required to prepare for both the Primary and Final FRCA exams.

Casarett &

Doull's Essentials of Toxicology, Third Edition

Academic Press

This volume provides an introduction to medicinal chemistry. It covers basic principles and background, and describes the general tactics and strategies involved in developing an effective drug.

Study Toxicology Through Questions

Lippincott Williams & Wilkins
Illustrated
Toxicology: With Study Questions is an essential, practical resource for self-study and guidance catering to a broad spectrum of students.

This book covers a

range of core toxicological areas, including pesticides, radioactive materials and poisonous plants, also presenting a section on veterinary toxicology. Across 16 chapters, the book presents key concepts with the aid of over 250 detailed, full-color illustrations. Each section is supplemented with practical exercises to support active learning. This combination of clear illustrations and sample testing will help readers gain a deeper understanding of toxicology. This book is useful for toxicology, pharmacy, medical and veterinary students, and also serves as a refresher for academics and professionals in the field, including

clinical pharmacists, forensic toxicologists, environmentalists and veterinarians. Includes comprehensive coverage of key toxicological concepts for study and revision. Provides a visual learning aid with over 250 full-color illustrations. Enhances understanding and memory retention of core concepts with the use of practical exercises.

500 Referenced Review Questions in Toxicology McGraw-Hill Education / Medical

This thoroughly revised and updated Third Edition of the classic Medical Toxicology is the definitive reference on the management of poisoned patients. More than 300 well-organized chapters written by eminent

authorities guide clinicians through the diagnosis and treatment of every poisoning or drug overdose. Chapter outlines, headings, and a detailed index enable readers to quickly locate exactly the information they need. This edition includes new chapters on biological and chemical weapons and on diagnosis of patients with apparent symptoms of poisoning when the cause is unknown. The book includes comparative commentary on toxicology practice in the United States, Europe, Australia, and Asia. Compatibility: BlackBerry® OS 4.1 or Higher / iPhone/iPod Touch 2.0 or Higher / Palm OS 3.5 or higher / Palm Pre Classic /

MCQs on Forensic Medicine And Toxicology Oxford University Press

Critical care medicine is an evolving speciality in which the amount of available information is growing daily and spread across a myriad of books, journals and websites. This essential guide brings together this information in an easy-to-use format. Up-to-date, relevant, and evidence-based information on the management of the critically ill is combined in one

resource, ideal for the use of Intensive Care Units, High Dependency Units, acute medical or surgical wards, Accident and Emergency departments and operating theatres. The book is designed such that each subject will form a self-contained topic in its own right, laid out across two or four pages to facilitate the key aim of rapid and easy access to information. This makes the information included simple to find, read and absorb, so that the book can be consulted in the clinic or ward setting for information on the optimum management of a particular condition. With chapters written by internationally renowned critical care

specialists and edited by the three of the leading figures in UK Critical Care, this book should be an essential resource for all critical care physicians.

Preparing to Pass the FRCA OUP Oxford
Best of Five MCQs for the Acute Medicine SCE is a new revision resource designed specifically for this high-stakes exam. It contains over 350 Best of Five questions with explanatory answers, each accurately reflecting the layout of questions in the exam.
