Inventaire bibliographique des Isiaca (IBIS), Volume 4 R-Z Arles [France] : Actes sud

Greek civilization and identity crystallized not when Greeks were close together but when they came to be far apart. It emerged during the Archaic period when Greeks founded coastal city states and trading stations in ever-widening horizons from the Ukraine to Spain. No center directed their diffusion: mother cities were numerous and the new settlements ("colonies") would often engender more settlements. The "Greek center" was at sea; it was formed through back-ripple effects of cultural convergence, following the physical divergence of independent settlements. "The shores of Greece are like hems stitched onto the lands of Barbarian peoples" (Cicero). Overall, and regardless of distance, settlement practices became Greek in the making and Greek communities far more resembled each other than any of their particular neighbors like the Etruscans, Iberians, Scythians, or Libyans. The contrast between "center and periphery" hardly mattered (all was peri-, "around"), nor was a bi-polar contrast with Barbarians of much significance. Should we admire the Greeks for having created their civilization in spite of the enormous distances and discontinuous territories separating their independent communities? Or did the salient aspects of their civilization form and crystallize because of its architecture as a de-centralized network? This book claims that the answer lies in network attributes shaping a "Small Greek World," where separation is measured by degrees of contact rather than by physical dimensions.

The Voyages of Sir James Lancaster, Kt., to the East Indies Editions Errance

This is the first ever documented study of the 1,035 identifiable Greek city states (poleis) of the Archaic and Classical periods (c.650-325 BC). Previous studies of the Greek polis have focused on Athens and Sparta, and the result has been a view of Greek society dominated by Sophokles', Plato's, and Demosthenes' view of what the polis was. This study includes descriptions of Athens and Sparta, but its main purpose is to explore the history and organization of the thousand other city states. The main part of the book is a regionally organized inventory of all identifiable poleis covering the Greek world from Spain to the Caucasus and from the Crimea to Libya. This inventory is the work of 47 specialists, and is divided into 46 chapters, each covering a region. Each chapter contains an account of the region, a list of second-order settlements, and an alphabetically ordered description of the poleis. This description covers such topics as polis status, territory, settlement pattern, urban centre, city walls and monumental architecture, population, military strength, constitution, alliance membership, colonization, coinage, and Panhellenic victors. The first part of the book is a description of the method and principles applied in the construction of the inventory and an analysis of some of the results to be obtained by a comparative study of the 1,035 poleis included in it. The ancient Greek concept of polis is distinguished from the modern term 'city state', which historians use to cover many other historic civilizations, from ancient Sumeria to the West African cultures absorbed by the nineteenth-century colonializing powers. The focus of this project is what the Greeks themselves considered a polis to be.

A Selection of Curious, Rare and Early Voyages ... Library of Alexandria

Fils d'un magistrat de la Gaule Aquitaine, un enfant de douze ans accompagne sur les routes son père, engagé dans une campagne électorale susceptible de lui conférer le sacerdoce suprême : le culte de l'Empereur à Condat-près de Lyon. De ville en ville et de découverte en découverte, le jeune Marcus complète son instruction, sous l'égide de son précepteur Philodoros. Mais voici que des aventures inattendues - et parfois sanglantes - viennent bouleverser le tranquille voyage prévu... Véritable plongée au cœur de l'Empire romain du II^e siècle après Jésus-Christ, ce roman, qu'il retrace les luttes de pouvoir ou qu'il mette en scène la vie quotidienne dans ses travaux et ses jours, ses spectacles et ses jeux, invite à parcourir un itinéraire où se conjuguent à merveille les vertus de l'histoire et de la fiction.

La 4^e de couverture indique : "À quoi ressemblait vraiment la Gaule? Comment vivaient " nos ancêtres " ? Étaient-ils comme les décrit la légende de grands blonds, vaguement brutaux et incultes, réellement gros mangeurs et violents batailleurs ? Cette civilisation qui continue de nous fasciner et de nourrir notre imaginaire était tout aussi mystérieux pour ses voisins, Grecs et Romains notamment, jusqu'à la conquête de César. Pourtant, au I^{er} siècle avant J.-C., un voyageur grec s'y est aventuré, le philosophe Poseidonios d'Apamée, dont les observations serviront de base aux écrits de César, Strabon, Diodore et bien d'autres. C'est à suivre les traces de ce tout premier visiteur que nous invite Jean-Louis Brunaux, dans un guide original de la Gaule. L'archéologue d'aujourd'hui recueille les informations du " touriste " d'antan, et leur échange constitue le meilleur guide de voyage de la civilisation gauloise."

Cet ouvrage est construit à partir d'un des livres de la Géographie de Strabon, écrit dans les premières années du I^{er} siècle de notre ère et présenté ici dans une nouvelle traduction. Le lecteur moderne est invité à emboîter le pas d'un voyageur de l'Antiquité partant à la découverte de la Gaule (mais aussi des Îles britanniques et des Alpes) avec le livre de Strabon comme guide. Le texte est accompagné de commentaires ou de notices de présentation destinés à éclairer, quand cela est nécessaire, le lecteur sur les lieux traversés ou les peuples rencontrés. L'ouvrage est en outre abondamment illustré, par des photos mais aussi des aquarelles de Jean-Claude Golvin qui restituent paysages, villes et sites tels qu'ils pouvaient se présenter aux voyageurs qui

les découvraient à cette époque (ou tels qu'ils seraient quelque temps plus tard). Un guide touristique de voyageur dans le temps.
