For every story of optimism about the growth of medical tourism to India, there are multiple others about medical neglect. Scratch the surface and you find a thick layer of corruption in this life-sustaining sector. This hard-hitting volume shows a mirror to society and, more specifically, to those associated with the health sector—on how healers, in many cases, are shifting shape to becoming predators. In the essays by contributors from within and outside the medical fraternity, we see the many faces, the many facets of corruption—from exorbitant billing by corporate hospitals to the non-merit-based selection in medical colleges to questionable motives playing strong in the area of organ transplantation. But Healers or Predators? is not only about the illness affecting the sector. It also offers solutions, and some stories of hope. The Foreword by Amartya Sen is an added bonus. ' This splendid, if depressing, book

will do a lot to remedy [the] momentous neglect [of healthcare]. We have excellent reasons to be grateful to the authors and editors of this important collection of investigative studies. ' —Amartya Sen  
The Criminal Law Journal Dr K Chaudhry  
From the vast ocean of the cardiovascular system Dr Rajat Chattopadhyay picked up those diseases, which are found on the homeopathic syllabus. A homeopath should have knowledge about the diseases of the cardiovascular system to know properly the scope and limitations.

Medical Ethics And Legislations For Doctor's - Part 3 Epilogue -Jammu Kashmir

The stories of doctors giving new lives to patients suffering from diseases happen to be quite interesting. There can emerge interesting and vivacious shades of colours in times of lull in the medical journey or throughout the course of this journey. This book is an attempt for readers to experience these beautiful shades of colours. This book tells the story of three doctors, each having their own stories. But many similarities can be drawn from the three stories. The light is thrown on middle-class family struggles and the efforts spewed by parents to make their children live a life much bigger than themselves and to carry forward their unfulfilled dreams. There is sheer dedication to fulfil one ' s dreams and calling for moments of renunciation. There is happiness derived from the joy of fulfilling one ' s parents ' longing wishes. The duty to treat patients is spanned. To instil demoralized people the lost will to live and the confidence to thrive brings a unique feeling of merriment. Its the moments of struggles and hardships that emerge as the mantra to ignite the courage to face the ordeals. The book contains the stories of Muralidhar Reddy, the doctor of the brain, Bharata Reddy, the doctor of the heart and Prasad, the doctor of the kidneys. The reason for writing the stories of these three is special— all of us are good friends. The friendship is indeed professional and displays the classic relationship between a doctor and a journalist. 50 Leading Cases of Supreme Court of India Universal Law Publishing  
Indian doctors, schooled in Western science, are ignorant of the medical ethics of their own culture. They make a

conscious effort to distance themselves from Ayurvedic medicine, in which the ethical codes are enshrined. Teachers and students forget that values have universal applicability, regardless of the mode of practice - Western or traditional - and that the patient remains the same regardless of the system. Unethical practices in getting entry into medical colleges as students.

The All-Pakistan Legal Decisions Soft Cover India is one of the fastest-growing economies in the world. Yet health is not a part of our ambitious development story. In fact, India's disproportionately stingy healthcare budget makes some of the poorer nations look better in comparison. Statistics, however, speak louder than critics: we have one of the highest numbers of women dying in childbirth and under-five mortality rates. Every year nearly sixty million people get pushed below the poverty line due to the health expenditures that they incur. But there are a few bright spots too: India has eradicated polio and reversed the incidence of HIV/AIDS by an impressive margin. Drawing on her experience as the former union health secretary, K. Sujatha Rao gives us an unsparingly candid insider's view of India's health system. This richly detailed book favours increasing the health budget, greater use of technology, and providing leadership and good governance. Rao argues that unless good health is prioritized as a national goal, India's growth story will remain largely self-congratulatory.

Comfort Care maniinder aulakh  
COMFORT CARE Dr. T. M. Jacob had an illustrious career in medicine and was working as an interventional cardiologist for forty years. His experiences in India, Africa, the UK, and America and the agonies and ecstasies of living and practicing medicine are immaculately narrated. At age eighty-four, Jacob developed progressive dementia and was transferred to an assisted living facility. Thoughts of end of life, pain, suffering, and lack of dignity befall, and he was preoccupied with thoughts of euthanasia. His confidant and assistant, an RN with training in elderly care, had some different thoughts. Book reviews:

"Immaculate narration. Highly readable. The theme has many layers too. An excellent work of biographic fiction" (Roger Waters, Rochester Review, February 2020).

'Whiteman in dark' is a memoir of a female doctor trained in Kashmir during the peak years of turmoil. The pain of spine-breaking crackdowns, unending curfews, violent protests and prolonged sieges is described in the setting of 'Downtown' Srinagar adjoining the area of Kohimaran where Muslims, Hindus, and Sikhs would converge and bow together. Besides an in-depth account of the effect of turmoil on the lives of medical students, medical education and healthcare the memoir describes how doctors were 'churned out in adverse

circumstances'. After militancy was curbed, the lull and calmness seen as signs of peace returning-was a temporary fatigue, with people flooding the streets again in 2008,2009 and 2010.This time the weapon was a 'stone' and not a gun. Same story happened,...Curfew returned, disorder prevailed and Kashmiri again was the target. Today became another yesterday. The memoir is meant to touch the heartstrings of all sensitive beings who believe in peace. It is first memoir by a Kashmiri female and first one by a doctor.

#### COMPLETE GUIDE TO CAREER

PLANNING Notion Press

Women in Science and Technology: Confronting Inequalities comprehensively explores women's status in the Science and Technology (S&T) domain by rigorously analysing and interpreting extensive recent information on major areas such as engineering, medicine, physical sciences, biosciences and mathematics. The book forcefully demonstrates that gender-based differences and expectations play the determining role in limiting women's participation in S&T. These exist in various forms, from making subject choices in school and opting for specific disciplines in college to embracing specific career avenues such as scientific research. This book shows how the construction of gendered identities is perpetuated through a masculine culture in the informal environment of elite educational institutes and in major S&T workplaces such as academia and research laboratories, which serve together to exclude women from peer groups and opportunities for advancement. The book makes substantive recommendations for policy measures on college admissions, improvement of institutional and organizational environments, and recruitment and capacity building for women in S&T. It calls for substantially reducing the myriad societal and familial barriers through cooperation and understanding.
