For years, we ' ve been taught that capitalism is good for freedom. Dominant right-wing talk radio hosts to this day recommend " libertarian " classics like Hayek ' s Road to Serfdom and Friedman ' s Capitalism and Freedom that claim markets free us, and this picture still dominates the schools and the political spectrum. Well get bent, one percent, because Rob Larson ' s Capitalism vs. Freedom: The Toll Road to Serfdom puts big business under a microscope. This book debunks the conservative classics while demonstrating that the marketplace has its own great centers of power, which the libertarian tradition itself claims is a limit to freedom. In fact, Larson illustrates how capitalism fails both this and other concepts of human liberty, not just failing to establish a right to a share of society ' s production, but also leaving us subject to the great power plays of the one percent ' s corporate property.

A prize-winning historian reveals how Stalin—not Hitler—was the animating force of World War II in this major new history. World War II endures in the popular imagination as a heroic struggle between good and evil, with villainous Hitler driving its events. But Hitler was not in power when the conflict erupted in Asia—and he was certainly dead before it ended. His armies did not fight in multiple theaters, his empire did not span the Eurasian continent, and he did not inherit any of the spoils of war. That central role belonged to Joseph Stalin. The Second World War was not Hitler's war; it was Stalin's war. Drawing on ambitious new research in Soviet, European, and US archives, Stalin's War revolutionizes our understanding of this global conflict by moving its epicenter to the east. Hitler's genocidal ambition may have helped unleash Armageddon, but as McMeekin shows, the war which emerged in Europe in September 1939 was the one Stalin wanted, not Hitler. So, too, did the Pacific war of 1941–1945 fulfill Stalin's goal of unleashing a devastating war of attrition between Japan and the "Anglo-Saxon" capitalist powers he viewed as his ultimate adversary. McMeekin also reveals the extent to which Soviet Communism was rescued by the US and Britain's self-defeating strategic moves, beginning with Lend-Lease aid, as American and British supply boards agreed almost blindly to every Soviet demand. Stalin's war machine, McMeekin shows, was substantially reliant on American matériel from warplanes, tanks, trucks, jeeps, motorcycles, fuel, ammunition, and explosives, to industrial inputs and technology transfer, to the foodstuffs which fed the Red Army. This unreciprocated American generosity gave Stalin's armies the mobile striking power to conquer most of Eurasia, from Berlin to Beijing, for Communism. A groundbreaking reassessment of the Second World War, Stalin's War is essential reading for anyone looking to understand the current world order.

In 1936, the monarchy faced the greatest threats to its survival in the modern era – the crisis of abdication and the menace of Nazism. The fate of the country rested in the hands of George V's sorely unequipped sons: Edward VIII abandoned his throne to marry divorced American socialite Wallis Simpson; Prince Henry preferred the sporting life of a country squire; the glamorous and hedonistic Prince George, Duke of Kent, was considered a wild card; and stammering George VI felt himself woefully unprepared for the demanding role of King. As Hitler's Third Reich tore up the boundaries of Europe and Britain braced itself for war, the new king struggled to manage internal divisions within the royal family. Drawing on many new sources including from the Royal Archives, Princes at War goes behind the palace doors to tell the thrilling drama of Britain at war.

Kennedy and Kirk LeMoynes " Lem " Billings met at Choate, until the President's assassination thirty years later, Jack and Lem remained best friends. Lem was a virtual fixture in the Kennedy family who even had his own room at the White House. Drawing on hundreds of letters and telegrams between the two, plus Lem Billings's oral history and interviews with family and friends like Ben Bradlee, Gore Vidal, and Ted Sorensen, award-winning Kennedy scholar David Pitts tells the story of an unusual friendship that endured despite an era of rampant homophobia.

Analyzes how literary representations of suicide have reinforced antiblackness in the modern world. Death Rights presents an antiracist critique of British romanticism by deconstructing one of its organizing tropes—the suicidal creative "genius." Putting texts by Olaudah Equiano, Mary Shelley, John Keats, and others into critical conversation with African American literature, black studies, and feminist theory, Deanna P. Koretsky argues that romanticism is part and parcel of the legal and philosophical discourses underwriting liberal modernity's antiblack foundations. Read in this context, the trope of romantic suicide serves a distinct political function, indexing the limits of liberal subjectivity and (re)inscribing the rights and freedoms promised by liberalism as the exclusive province of white men. The first book-length study of suicide in British romanticism, Death Rights also points to the enduring legacy of romantic ideals in the academy and contemporary culture more broadly. Koretsky challenges scholars working in historically Eurocentric fields to rethink their identification with epistemes rooted in antiblackness. And, through discussions of recent cultural touchstones such as Kurt Cobain's resurgence in hip-hop and Victor LaValle's comic book

sequel to Frankenstein, Koretsky provides all readers with a trenchant analysis of how eighteenth-century ideas about suicide continue to routinize antiblackness in the modern world. Deanna P. Koretsky is Assistant Professor of English at Spelman College.

One of the most dramatic images of the French Revolution is of Parisian market women sloshing through mud and dragging cannons as they marched on Versailles and returned with bread and the king. These market women, the Dames des Halles, sold essential foodstuffs to the residents of the capital but, equally important, through their political and economic engagement, held great revolutionary influence. Politics in the Marketplace examines how the Dames des Halles invented notions of citizenship through everyday trade. It innovatively interweaves the Dames' political activism and economic practices to reveal how marketplace actors shaped the nature of nascent democracy and capitalism through daily commerce. While haggling over price controls, fair taxes, and acceptable currency, the Dames and their clients negotiated tenuous economic and social contracts in tandem, remaking longstanding Old Regime practices. In this environment, the Dames conceptualized a type of economic citizenship in which individuals' activities such as buying goods, selling food, or paying taxes positioned them within the body politic and enabled them to make claims on the state. They insisted that their work as merchants served society and demanded that the state pass favorable regulations for them in return. In addition, they drew on their patriotic work as activists and their gendered work as republican mothers to compel the state to provide practical currency and assist indigent families. Thus, their notion of citizenship portrayed useful work, rather than gender, as the cornerstone of civic legitimacy. In this original work, Katie Jarvis challenges the interpretation that the Revolution launched an inherently masculine trajectory for citizenship and reexamines work, gender, and citizenship at the cusp of modern democracy.

From New York Times bestselling author Sam Kean comes incredible stories of science, history, finance, mythology, the arts, medicine, and more, as told by the Periodic Table. Why did Gandhi hate iodine (I, 53)? How did radium (Ra, 88) nearly ruin Marie Curie's reputation? And why is gallium (Ga, 31) the go-to element for laboratory pranksters?* The Periodic Table is a crowning scientific achievement, but it's also a treasure trove of adventure, betrayal, and obsession. These fascinating tales follow every element on the table as they play out their parts in human history, and in the lives of the (frequently) mad scientists who discovered them. THE DISAPPEARING SPOON masterfully fuses science with the classic lore of invention, investigation, and discovery--from the Big Bang through the end of time. *Though solid at room temperature, gallium is a moldable metal that melts at 84 degrees Fahrenheit. A classic science prank is to mold gallium spoons, serve them with tea, and watch guests recoil as their utensils disappear.

In The Assassin's Accomplice, historian Kate Clifford Larson tells the gripping story of Mary Surratt, a little-known participant in the plot to kill Abraham Lincoln, and the first woman ever to be executed by the federal government of the United States. Surratt, a Confederate sympathizer, ran the boarding house in Washington where the conspirators—including her rebel son, John Surratt—met to plan the assassination. When a military tribunal convicted her for her crimes and sentenced her to death, five of the nine commissioners petitioned President Andrew Johnson to show mercy on Surratt because of her sex and age. Unmoved, Johnson refused—Surratt, he said, "kept the nest that hatched the egg." Set against the backdrop of the Civil

War, The Assassin's Accomplice tells the intricate story of the Lincoln conspiracy through the eyes of its only female participant. Based on long-lost interviews, confessions, and court testimony, the text explores how Mary's actions defied nineteenth-century norms of femininity, piety, and motherhood, leaving her vulnerable to deadly punishment historically reserved for men. A riveting narrative account of sex, espionage, and murder cloaked in the enchantments of Southern womanhood, The Assassin's Accomplice offers a fresh perspective on America's most famous murder.

With the moral stamina and intellectual pose of a twentieth-century Titan, this slightly built, duitful, unassuming chemist set out systematically to remember the German hell on earth, steadfastly to think it through, and then to render it comprehensible in lucid, unpretentious prose. He was profoundly in touch with the minutest workings of the most endearing human events and with the most contemptible. What has survived in Levi's writing isn't just his memory of the unbearable, but also, in THE PERIODIC TABLE and THE WRENCH, his delight in what made the world exquisite to him. He was himself a "magically endearing man, the most delicately forceful enchanter I've ever known" - PHILIP ROTH

From New York Times bestselling author Sam Kean comes incredible stories of science, history, language, and music, as told by our own DNA. In The Disappearing Spoon, bestselling author Sam Kean unlocked the mysteries of the periodic table. In THE VIOLINIST'S THUMB, he explores the wonders of the magical building block of life: DNA. There are genes to explain crazy cat ladies, why other people have no fingerprints, and why some people survive nuclear bombs. Genes illuminate everything from JFK's bronze skin (it wasn't a tan) to Einstein's genius. They prove that Neanderthals and humans bred thousands of years more recently than any of us would feel comfortable thinking. They can even allow some people, because of the exceptional flexibility of their thumbs and fingers, to become truly singular violinists. Kean's vibrant storytelling once again makes science entertaining, explaining human history and whimsy while showing how DNA will influence our species' future.

A stunning look inside the world of violent hate groups by a onetime white supremacist leader who, shaken by a personal tragedy, realized the error of his ways and abandoned his destructive life to become an anti-hate activist. As he stumbled through high school, struggling to find a community among other fans of punk rock music, Christian Picciolini was recruited by a now notorious white power skinhead leader and encouraged to fight with the movement to "protect the white race from extinction." Soon, he had become an expert in racist philosophies, a terror who roamed the neighborhood, quick to throw fists. When his mentor was arrested and sentenced to eleven years in prison, sixteen-year-old Picciolini took over the man's role as the leader of an infamous neo-Nazi skinhead group. Seduced by the power he accrued through intimidation, and swept up in the rhetoric he had adopted, Picciolini worked to grow an army of extremists. He used music as a recruitment tool, launching his own propaganda band that performed at white power rallies around the world. But slowly, as he started a family of his own and a job that for the first time brought him face to face with people from all walks of life, he began to recognize the cracks in his hateful ideology. Then a shocking loss at the hands of racial violence changed his life forever, and Picciolini realized too late the full extent of the harm he'd caused. Raw, inspiring, and heartbreakingly candid, *Romantic Violence* tells the fascinating story of how so many young people lose themselves in a culture of hatred and violence and how the criminal networks they forge terrorize and divide our nation.

From the author of the award-winning, best-selling novel *Matterhorn*, comes a brilliant nonfiction book about war In 1968, at the age of twenty-three, Karl Marlantes was dropped into the highland jungle of Vietnam, an inexperienced lieutenant in command of a platoon of forty Marines who would live or die by his decisions. Marlantes survived, but like many of his brothers in arms, he has spent the last forty years dealing with his war experience. In *What It Is Like to Go to War*, Marlantes takes a deeply personal and candid look at what it is like to experience the ordeal of combat, critically examining how we might better prepare our soldiers for war. Marlantes weaves riveting accounts of his combat experiences with thoughtful analysis, self-examination, and his readings—from Homer to The Mahabharata to Jung. He makes it clear just how poorly prepared our nineteen-year-old warriors are for the psychological and spiritual aspects of the journey. Just as *Matterhorn* is already being acclaimed as acclaimed as a classic of war literature, *What It Is Like to Go to War* is set to become required reading for anyone—soldier or civilian—interested in this visceral and all too essential part of the human experience.

Letters Written by a Turkish Spy Oxford University Press

On two hundred and one days between May 1, 1245, and August 1, 1246, more than five thousand people from the Lauragais were questioned in Toulouse about the heresy of the good men and the good women (more commonly known as Catharism). Nobles and diviners, butchers and monks, concubines and physicians, blacksmiths and pregnant girls--in short, all men over fourteen and women over twelve--were summoned by Dominican inquisitors Bernart de Caux and Jean de Saint-Pierre. In the cloister of the Saint-Sernin abbey, before scribes and witnesses, they confessed whether they, or anyone else, had ever seen, heard, helped, or sought salvation through the heretics. This inquisition into heretical depravity was the single largest investigation, in the shortest time, in the entire European Middle Ages. Mark Gregory Pegg examines the sole surviving manuscript of this great inquisition with unprecedented care--often in unexpected ways--to build a richly textured understanding of social life in southern France in the early thirteenth century. He explores what the interrogations reveal about the individual and communal lives of those interrogated and how the interrogations themselves shaped villagers' perceptions of those lives. *The Corruption of Angels*, similar in breadth and scope to Emmanuel Le Roy Ladurie's *Montaillou*, is a major contribution to the field. It shows how heretical and orthodox beliefs flourished side by side and, more broadly, what life was like in one particular time and place. Pegg's passionate and beautifully written evocation of a medieval world will fascinate a diverse readership within and beyond the academy.

The Sympathizer Little, Brown

In the early fifteenth century, the general council assembled at Constance and, representing the universal Church, put an end to the scandalous schism which for almost forty years had divided the Latin Church between rival lines of claimants to the papal office. It did so by claiming and exercising an authority superior to that of the pope, an authority by virtue of which it could impose constitutional limits on the exercise of his prerogatives, stand in judgement over him, and if need be, depose him for wrongdoing. In so acting the council gave historic expression to a tradition of conciliarist constitutionalism which long competed for the allegiance of Catholics worldwide with the high papalist monarchical vision that was destined to triumph in 1870 at Vatican I and to become identified with Roman Catholic orthodoxy itself. This book sets out to reconstruct the half-millennial history of that vanquished rival tradition.

A National Bestseller! What does an undocumented immigrant look like? What kind of family must she come from? How could she get into this country? What is the true price she must pay to remain in the United States? JULISSA ARCE knows firsthand that the most common, preconceived answers to those questions are sometimes far too simple—and often just plain wrong. On the surface, Arce's story reads like a how-to manual for achieving the American dream: growing up in an apartment on the outskirts of San Antonio, she worked tirelessly, achieved academic excellence, and landed a coveted job on Wall Street, complete with a six-figure salary. The level of professional and financial success that she achieved was the very definition of the American dream. But in this brave new memoir, Arce digs deep to reveal the physical, financial, and emotional costs of the stunning secret that she, like many other high-achieving, successful individuals in the United States, had been forced to keep not only from her bosses, but even from her closest friends. From the time she was brought to this country by her hardworking parents as a child, Arce—the scholarship winner, the honors college graduate, the young woman who climbed the ladder to become a vice president at Goldman Sachs—had secretly lived as an undocumented immigrant. In this surprising, at times heart-wrenching, but always inspirational personal story of struggle, grief, and ultimate redemption, Arce takes readers deep into the little-understood world of a generation of undocumented immigrants in the United States today—people who live next door, sit in your classrooms, work in the same office, and may very well be your boss. By opening up about the story of her successes, her heartbreaks, and her long-fought journey to emerge from the shadows and become an American citizen, Arce shows us the true cost of achieving the

American dream—from the perspective of a woman who had to scale unseen and unimaginable walls to get there.

When British hat manufacturer Christopher Brooke is arrested under Regulation 18B in June 1940 a slow process of personal disintegration begins. Taking us into the pre-war political era of Ishiguro's *Remains of the Day*, Mad Hatter delves into the lives of Britons, tracking them through a darkening time. Irish farm girl, Mary Byrne, arrives in England in July 1940 to work as housekeeper for Cynthia Brooke and her three children, bonding with the family. When Mary is shockingly expelled from the house upon Christopher's release, her narration continues through the mouth of 15-month-old Katie. Mad Hatter charts the slow unravelling of a marriage as the story of the Brooke family moves inexorably to a tragic conclusion.

The "exciting" and "clever" debut thriller (New York Times Book Review): No one knows what happened that night. Seven strangers must decide. Earl Thomas, a straight-laced taxman with his fair share of police encounters, is the begrudging foreperson in a high-stakes trial in Miami. Laura Hurtado-Perez is a physician whose unassuming manner conceals a private pain. Joseph Cole is the founder of his local neighborhood watch, unduly obsessed with the families around him. Along with four others, these jurors of varying ages and walks of life whose paths would likely never have otherwise crossed must come together to make one of the most important decisions of their lives. On the night Melina Mora, a free-spirited woman both proud and kind, was murdered, she was seen with a young man of Gabriel Soto's description. Two strands of her hair were found in his bedroom. Sandy Grunwald, a young prosecutor whose political ambitions depend on securing a conviction, finds herself pitted against Jordan Whipple, a preening public defender armed with a freshly discovered, dynamite piece of evidence on the eve of the trial—if the Honorable Darla Tackett will admit it. What Sandy, Jordan, and Judge Tackett all know, however, is that the criminal justice system is complicated, and everyone has a story—especially the jury. And it's their experiences, biases, and beliefs that will ultimately shape the verdict. With striking originality and expert storytelling, Robin Peguero's debut novel explores the prejudice that hangs over every trial in America. You've never read a legal thriller quite like this. There's never been a thriller writer quite like Peguero. And you will not be able to predict how it all ends.

At the outset of the Vietnam War, the Army created an experimental fighting unit that became known as "Tiger Force." The Tigers were to be made up of the cream of the crop—the very best and bravest soldiers the American military could offer. They would be given a long leash, allowed to operate in the field with less supervision. Their mission was to seek out enemy compounds and hiding places so that bombing runs could be accurately targeted. They were to go where no troops had gone, to become one with the jungle, to leave themselves behind and get deep inside the enemy's mind. The experiment went terribly wrong. What happened during the seven months Tiger Force descended into the abyss is the stuff of nightmares. Their crimes were uncountable, their madness beyond imagination—so much so that for almost four decades, the story of Tiger Force was covered up under orders that stretched all the way to the White House. Records were scrubbed, documents were destroyed, men were told to say nothing. But one person didn't follow orders. The product of years of investigative reporting, interviews around the world, and the discovery of an astonishing array of classified information, Tiger Force is a masterpiece of journalism. Winners of the Pulitzer Prize for their Tiger Force reporting, Michael Sallah and Mitch Weiss have uncovered the last great secret of the Vietnam War.
