Outdoor learning continues to play an essential role in early years education, and this new edition of a bestselling book explores how the Forest School approach can be easily and effectively incorporated into early years practice. Expanding on aspects of

Forest School teaching, and drawing on new developments and policy changes within the field, this new edition also includes: - a new chapter on working with parents - greater coverage of the 0-2 age range - new case studies to aid learning - coverage of international approaches to Forest School

Yet again Sara Knight delivers an inspirational text for all those working in or studying early years education and care. Sara Knight is an experienced early years educator and Senior Lecturer at Anglia Ruskin University. She is a trained Forest School practitioner and author of *Forest Schools For All* and *Risk and Adventure in Early Years Outdoor Play* (both published by SAGE).

Cosa sono gli agrinidi? Cos'è un asilo nel bosco? Come realizzare percorsi di educazione per l'infanzia nella natura? Come coniugare la propria professione di educatore, psicologo, contadino con l'educazione dei più piccoli in aziende agricole? Il libro offre risposte a queste domande a partire dalle esperienze degli autori, impegnati in prima persona nell'organizzazione e diffusione di progetti di natura educante. Scopriremo che la rivoluzione educativa costituita da agrinidi e agriasili, asili nel bosco e aule di campagna è già in atto e conta svariate esperienze in tutta Italia, talvolta anche in città. Una guida pratica rivolta a genitori, educatori e agricoltori, che fornisce istruzioni dettagliate ed esempi concreti a chi vorrebbe inserire nella propria azienda agricola un agrinido o agriasilo oppure aprire un asilo nel bosco.

Routledge International Handbook of Outdoor Studies Terra Nuova Edizioni

The Journeyl, a mixture of journey and journal, allows you to take notes during your journey into wellness and thankfulness. It is a space where people can write about what they are thankful for, how they feel, who/what they smile at, their acts of kindness, their goals, and what they do for their body and for their hearts and souls. It is not meant to be diagnostic, but simply a journal, or a Journeyl to facilitate our ability to be kind to ourselves and our world, and to embrace positivity in our daily routine.

Agrinidi, agriasili e asili nel bosco Algonquin Books

A coordinated and comprehensive volume of international research on this subject edited by members of the well-established European Early Childhood Education Research Association

Outdoor Play and Learning SIG (OPAL).

"Exchanging ideas, creating projects, establishing collaborations: these are events that often take place around a table during a meal and in moments of

conviviality, where the quality of the conversation becomes warmer and more empathic. In Reggio Emilia, the choice of having a kitchen in each of the

municipal Infant-toddler Centers and Preschools has always conveyed strong meaning, both pedagogical and cultural. the kitchen represents a sort of gastronomic "resistance" that safeguards diversity and values and respects different tastes, religious choices, and medical indications. The kitchen is a place for listening to the families and their habits, as well as for orientation toward the community, where lunchtime becomes a space and context of relationships and encounters with the world This is the backdrop for a "cookbook" made up of good recipes, experiences, projects, and thoughts that are constructed and take shape in and around the kitchen"--Page 4 of cover.

Drawing both on

micro and macro, national and comparative studies, this volume traces some of the trends and analyzes in comparative perspective how they affect images and practices of childhood and transforms responsibilities for children.

The SAGE Handbook of Outdoor Play and Learning OUP Oxford

For many of us, thinking about the future conjures up images of Cormac McCarthy's *The Road*: a post-apocalyptic dystopia stripped of nature. Richard Louv, author of the landmark bestseller *Last Child in the*

Woods, urges us to change our vision of the future, suggesting that if we reconceive environmentalism and sustainability, they will evolve into a larger movement that will touch every part of society. This New Nature Movement taps into the restorative powers of the natural world to boost mental acuity and creativity; promote health and wellness; build smarter and more sustainable businesses, communities, and economies; and ultimately strengthen human

bonds. Supported by groundbreaking research, anecdotal evidence, and compelling personal stories, Louv offers renewed optimism while challenging us to rethink the way we live.

Farming for Health describes the use of farms, farm animals, plants and landscapes as a base for promoting human mental and physical health and social well-being. The book offers an overview of the

development of 'Farming to early childhood than for Health' initiatives across Europe, resulting from changing paradigms in health care and the demand for new social and financial activities in agriculture and rural areas. The contributors are drawn from a range of countries and disciplines.

The Journey

Youcanprint
Education at a
Glance 2014:
Highlights
summarises the
OECD's flagship
compendium of
education
statistics,
Education at a
Glance. It provides
easily accessible
data on key topics
in education today,
including: (i)
Education levels
and student
numbers: How far
have adults
studied, and how
does early
childhood education
affect student
performance later
on?; (ii) Higher
education and work:
How many young
people graduate

from tertiary
education, and how
easily do they
enter the world of
work?; (iii)
Economic and social
benefits of
education: How does
education affect
people's job
prospects, and what
is its impact on
incomes?; (iv)
Paying for
education: What
share of public
spending goes on
education, and what
is the role of
private spending?;
(v) The school
environment: How
many hours do
teachers work, and
how does class size
vary?; (vi) Each
indicator is
presented on a two-

page spread. The left-hand page explains the significance of the indicator, discusses the main findings, examines key trends and provides readers with a roadmap for finding out more in the OECD education databases and in other OECD education publications. The right-hand page contains clearly presented charts and tables, accompanied by dynamic hyperlinks (StatLinks) that direct readers to the corresponding data in Excel format.

Childhood and Nature

Springer Science & Business Media
"David Blau has chosen seven economists to write chapters that review the emerging economic literature on the supply of child care, parental demand for care, child care cost and quality, and to discuss the implications of these analyses for public policy. The book succeeds in presenting that research in understandable terms to policy makers and serves economists as a useful review of the child care literature...provides an excellent case study of the value of economic analysis of public policy

issues." –Arleen Leibowitz, *Journal of Economic Literature* "There is no doubt this is a timely book....The authors of this volume have succeeded in presenting the economic material in a nontechnical manner that makes this book an excellent introduction to the role of economics in public policy analysis, and specifically child care policy....the most comprehensive introduction currently available."

–Cori Rattelman, *Industrial and Labor Relations Review*

Ecological Identity
SAGE

La tesi argomenta le principali tesi di Ivan Illich in tema di mobilità, scuola e relazioni sociali. Contiene documenti inediti in Italia: il manifesto dei descolarizzatori, le lettere di John Holt, alcuni brani commentati al CIDOC (CENTRO DI DOCUMENTAZIONE gestito dal filosofo); periodici italiani e spagnoli degli anni Settanta e bollettini delle scuole di quartiere autogestite. Si argomenta in particolare la tesi secondo la quale la scuola è una struttura storicamente determinata, appoggiata dalla

borghesia e più tardi dalla classe proletaria per legittimare la 'emancipazione', ovvero la scalata sociale dei più adatti in una società consumistica. Parole come 'DEMOCRAZIA', 'EMANCIPAZIONE', 'SOSTENIBILITÀ' e 'RISORSE' in coerenza con la prospettiva epistemica dell'autore, risultano ribaltate rispetto al significato comunemente diffuso, dimostrando la loro implicazione nelle ingiustizie sociali e nell'autodistruzione

one dell'uomo attraverso le guerre, la competizione e il degrado sociale e naturalistico. Nelle conclusioni si accenna a scuola 'altre' nate pensando ad un mondo 'altro' dal modello consumistico-occidentale. Environmental Education Independently Published 'This is an invigorating and very thought-provoking text, that I would recommend to all early years professionals, parents and citizens interested in developing their

understanding of early years philosophy in action, which is directly linked to a compelling research paradigm and deep reflection alongside a sound theoretical base' - Early Years 'I would recommend this book to practitioners interested in reflecting on their own practice and approach to assessment. The insights provided are thought-provoking and promote a practical and positive approach to early years assessment' - Early Talk 'This thoughtful book

challenges the standard assessment process that is commonly employed within the context of early years provision. For any practitioners working in early years setting this is a powerful and exciting book that helps to remind us that the child must be placed centrally within the assessment process, not as a recipient but as a proactive contributor to the situation'- Child Language Teaching and Therapy 'This is a highly relevant text as some UK early childhood educators become engulfed

children's learning procedures, as the
and progress.... I chapters focusing

on the child as a learner are of value on their own' - Julia Browne, Goldsmiths Association for Early Childhood This book shows that an early childhood setting can be described as a learning place in which children develop learning dispositions such as resilience in the face of uncertainty, confidence to express their ideas, and collaborative and thoughtful approaches to problem-solving. These dispositions provide the starting point for

life-long learning. The author asks: How can we assess and track children's learning in the early years in a way that includes learning dispositions and avoids the pitfalls of over-formal methods, whilst being helpful for practitioners, interesting for families, and supportive for learners? The book - describes a way of assessment that stays close to the children's real experiences and provides an alternative to mechanistic and fragmented approaches, - shows

how practitioners can assess what really matters: those learning dispositions (interest, involvement and perseverance for example) that provide a foundation for life-long learning. The book is about weaving theory and practice: theorizing development and learning as reflected in assessment practice. The author also argues that unless we find ways to assess complex outcomes in early childhood they will be excluded from the

teaching and the learning. Simple and low level outcomes and goals will take their place. The theoretical ideas and arguments are illustrated throughout by transcripts and stories of children in a range of early childhood settings. At every turn in the journey it asks: How is this reflected in a real life context? It documents the voices of children, practitioners and parents as the learning story develops. *The Languages of Food* OECD Publishing

«Se il mare, alzandosi di pochi metri, ricoprisse quel golfo di terra che è la valla padana, l'Italia sarebbe una sola e grande montagna», scriveva Meuccio Ruini nel 1919. In Italia, accanto ai problemi di latitudine, vi sono quelli di altitudine. Se letto attraverso queste lenti, il Nord - come l'intero paese - appare come il mosaico di una geografia policentrica composta da sistemi territoriali rugosi che intrecciano senza soluzione di continuità ampie

zone pianeggianti, aree urbane estese, valli e montagne. Tipi di montagne e di pianure, intersecati con grandi città, ma anche con sistemi di città medie contornati da montagne. È il policentrismo metromontano del nostro paese, dimensione che richiede nuovi atlanti e nuove mappe che mostrino alla politica la possibilità di non governare con la montagna alle spalle e lo sguardo speranzoso alla sola pianura, come se la montagna non potesse generare ricchezza e

benessere. Le politiche separano sulla base di confini che hanno natura amministrativa, in ossequio a criteri disegnati dai centri o in funzione della ricerca del consenso politico, e solo raramente accompagnano e valorizzano le interdipendenze funzionali, i flussi di risorse e le persone che vivono e lavorano a cavallo di questi confini. La valorizzazione del policentrismo richiede politiche di connessione tra territori capaci di generare nuovi

mercati, di costruire reti e infrastrutture, di contrastare il depopolamento e gli effetti del cambiamento climatico. Questo nuovo studio dell'Associazione Riabitare l'Italia, dopo il Manifesto pubblicato nel 2020, interviene in una discussione pubblica quanto mai attiva sui possibili nuovi rapporti tra territori metropolitani e rural-montani, che è sempre più attuale in tempi di smart working e di ripopolamento dei centri minori in abbandono.
