Moving from tourism to health propaganda, marriage to beauty contest, mass communication to music, Middle Eastern and North African Societies in the Interwar Period offers a vibrant and dynamic picture of the region which goes beyond state borders.

Workers and Narratives of Survival in Europe Springer Nature

Progettare è un ' arte ed è davvero necessario essere un po ' artisti per riuscire a farlo correttamente. Quando si crea un progetto, diventa indispensabile immaginare tutto, preventivare ogni singola funzione, ogni comportamento, sia esso

dell ' utente o del sistema, ed è fondamentale anche specificare ogni variabile di interesse per avere un pieno controllo dell ' intero ciclo di vita del progetto. Per raggiungere questi obiettivi bisogna comprendere completamente le richieste del cliente, tenersi al passo con i tempi e con la tecnologia. Essere innovativi è la grande sfida. In questo libro, comprenderemo meglio quali sono le sfide principali da affrontare durante la realizzazione di un qualsiasi prototipo elettronico. Nell'ultimo capitolo discuteremo di intelligenza artificiale e robotica, un tema di grande attualità . Il tutto, ovviamente, mediante esempi pratici e prototipi di casi reali.

City Tourism & Culture Routledge  
An introduction to marketing concepts, strategies and practices with a balance of depth of coverage and ease of learning. Principles of Marketing keeps pace with a rapidly changing field, focussing on the ways brands create and capture consumer value. Practical content and linkage are at the heart of this edition. Real local and international examples bring ideas to life and new feature 'linking the concepts' helps students test and consolidate understanding as they go.

The latest edition enhances understanding with a unique learning design including revised, integrative concept maps at the start of each chapter, end-of-chapter features summarising ideas and themes, a mix of mini and major case studies to illuminate concepts, and critical thinking exercises for applying skills.

The Curse of Capistrano Illustrated Alinea Editrice

Second edition of the provocative study analyzing the social, cultural, and historical roots of modern Libya.

Middle Eastern and North African Societies in the Interwar Period Franchini Roberto  
Millions of young people—and increasingly some not-so-young people—now work as interns. They famously shuttle coffee in a thousand magazine offices, legislative backrooms, and Hollywood studios, but they also deliver aid in Afghanistan, map the human genome, and pick up garbage. Intern Nation is the first expos é of the exploitative world of internships. In this witty, astonishing, and serious investigative work, Ross Perlin profiles fellow interns, talks to academics and professionals

about what unleashed this phenomenon, and explains why the intern boom is perverting workplace practices around the world. The hardcover publication of this book precipitated a torrent of media coverage in the US and UK, and Perlin has added an entirely new afterword describing the growing focus on this woefully underreported story. Insightful and humorous, Intern Nation will transform the way we think about the culture of work.

Slow Franco Angeli

Historical debates about capitalism, unfreedom and primitive accumulation suggest Marxism accepts that, where class struggle is global, capitalists employ unfree workers. Labour-power as commodity means the free/unfree distinction informs the process of becoming, being, remaining, and acting as a proletariat.

Dal progetto al prototipo Routledge

History of Old Age is the first major study of the ways in which old age has been perceived in western culture throughout history. Georges Minois paints a vast fresco, starting with the first old man to relate his own story—an Egyptian scribe some 4500 years ago—and ending with the deaths of Elizabeth I and Henry IV in the sixteenth century. Tracing the changing conceptions of the nature, value, and burden of the old, Minois argues that western history during this period is marked by great fluctuation in the social and political role of the aged. Minois shows how, in ancient Greece, the cult of youth and beauty on the one hand, and the reverence for the figure of the Homeric sage, on the other, created an ambivalent attitude toward the aged. This ambiguity appears again in the contrast between the active role that older citizens played in Roman politics and their depiction in satirical literature of the period.

Christian literature in the Middle Ages also played a large part in defining society's perception of the old, both in the image of the revered holy sage and in the total condemnation of the aged sinner. Drawing on literary texts throughout, Minois considers the interrelation of literary, religious, medical, and political factors in determining the social fate of the elderly and their relationship to society. This book will be of great interest to social and cultural historians, as well as to general readers interested in the subject of the aged in society today.

Abitare Inter-Governmental Maritime

The course includes technical aspects of teaching that have a direct relation with the maritime simulator world. Without delving into the details at this stage, it is however emphasized that the simulator pedagogy, as well as psychology of learning forms an important element of the course. The topics that have been covered in this modular course have been chosen in such a way

as to provide a valuable introduction for those who have little experience in teaching and also as a very useful refresher for experienced instructors. In addition, those whose teaching experience has been limited to lecturing will gain considerable exposure, as they will explore the world of maritime simulation along with a variety of teaching techniques. The course deals with the relevance of simulator in maritime training and the simulator pedagogy associated with the use of training on a maritime simulator. The basic aspects of the learning process, purpose of training, setting of training objectives and basic principles of course design and the psychology of learning has also been touched upon, however it does not form the main thrust of the course. It is assumed that course participants would have received formal training in these aspects prior to completing this programme. The course has a large practical component in which the participants implement the theoretical guidelines by planning, creating, executing and evaluating their own simulation exercises. The experimental nature of the course being conducted largely using simulators provides the participants the opportunity to hone the necessary skills required to be an effective simulator instructor.

Alcyone New Directions Publishing

Based on eight years of research visiting dozens of startups, tech companies and incumbents, Harvard Business School professor Thales Teixeira shows how and why consumer industries are disrupted, and what established companies can do about it—while highlighting the specific strategies potential startups use to gain a competitive edge. There is a pattern to digital disruption in an industry, whether the disruptor is Uber, Airbnb, Dollar Shave Club, Pillpack or one of countless other startups that have stolen large portions of market share from industry leaders, often in a matter of a few years. As Teixeira makes clear, the nature of competition has fundamentally changed. Using innovative new business models, startups are stealing customers by breaking the links in how consumers discover, buy and use products and services. By decoupling the customer value chain, these startups, instead of taking on the Unilevers and Nikes, BMW's and Sephoras of the world head on, peel away a piece of the consumer purchasing process. Birchbox offered women a new way to sample beauty products from a variety of companies from the convenience of their homes, without having to visit a store. Turo doesn't compete with GM. Instead, it offers people the benefit of driving without having to own a car themselves. Illustrated with vivid, in-depth and exclusive accounts of both startups, and reigning incumbents like Best Buy and Comcast, as they struggle to respond, *Unlocking the Customer Value Chain* is an essential guide to demystifying how digital disruption takes place — and what companies can do to defend themselves.

*Mercati del lavoro locali e strategie formative, con particolare riguardo all'Alto Adige*  
FrancoAngeli

For almost a century, educational theory and practice have been influenced by the view of behavioural psychologists that learning is synonymous with behaviour change. In this book, the authors argue for the practical

importance of an alternate view, that learning is synonymous with a change in the meaning of experience. They develop their theory of the conceptual nature of knowledge and describe classroom-tested strategies for helping students to construct new and more powerful meanings and to integrate thinking, feeling, and acting. In their research, they have found consistently that standard educational practices that do not lead learners to grasp the meaning of tasks usually fail to give them confidence in their abilities. It is necessary to understand why and how new information is related to what one already knows. All those concerned with the improvement of education will find something of interest in *Learning How to Learn*.

*World Labour Market* State University of New York Press

Chronicles the growing impact of job uncertainty on workers in Europe.

*The Emperor's Tomb* SUNY Press

Winner of the first Paul A. Baran-Paul M. Sweezy Memorial Award for an original monograph concerned with the political economy of imperialism, John Smith's *Imperialism in the Twenty-First Century* is a seminal examination of the relationship between the core capitalist countries and the rest of the world in the age of neoliberal globalization. Deploying a sophisticated Marxist methodology, Smith begins by tracing the production of certain iconic commodities—the T-shirt, the cup of coffee, and the iPhone—and demonstrates how these generate enormous outflows of money from the countries of the Global South to transnational corporations headquartered in the core capitalist nations of the Global North. From there, Smith draws on his empirical findings to powerfully theorize the current shape of imperialism. He argues that the core capitalist countries need no longer rely on military force and colonialism (although these still occur) but increasingly are able to extract profits from workers in the Global South through market mechanisms and, by aggressively favoring places with lower wages, the phenomenon of labor arbitrage. Meticulously researched and forcefully argued, *Imperialism in the Twenty-First Century* is a major contribution to the theorization and critique of global capitalism.

L'Espresso Verso Books

The measurement of tourism is not an easy task. In the last decade there has been a growing interest in the tourism world in new methods to measure demand and supply of tourism. Fully revised and updated, the second edition of *The Economics of Tourism Destinations* provides a succinct guide to the economic aspects of tourism for students and practitioners alike to decipher the methods of measurement of supply, demand, trends and

impacts. This book emphasizes new aspects such as measurement of tourism (e.g. Tourism Satellite Account), supply trends, competition models, macro evaluation of tourism projects and events and the role of tourism in a development strategy. Each chapter combines theory and practice and international case studies are provided.

The Making of Modern Libya NYU Press

This comprehensive volume seeks out ways in which those who are typically marginalized by, or excluded from, tourism can be brought into the industry in ways that directly benefit them. It addresses the central questions asked by an inclusive tourism approach: Who is included? On what terms? With what significance? Tourism is often understood and experienced as an exclusive activity, accessible only to the relatively wealthy. This volume seeks to counter that tendency by exploring how marginalized groups can gain more control over tourism. The book starts by defining the concept of inclusive tourism and discussing seven different elements which might indicate inclusivity in tourism. Research from a wide range of geographical contexts — from Cambodia to Australia, Sweden, Turkey and Spain — have been drawn upon to illustrate the need for more inclusive tourism. The examples encompass the actions of a multinational tour operator, hotel owners, and social enterprises, while also examining how to ensure tourism is accessible for those with disabilities. Inclusive tourism is offered here as both an analytical concept and an aspirational ideal. The authors hope that this book inspires a restless quest to find ways to include new actors and new places in tourism on terms that are equitable and sustainable. The chapters were originally published as a special issue of the journal *Tourism Geographies*.

Economic growth and the creation of wealth have cut global poverty rates, yet vulnerability, inequality, exclusion and violence have escalated within and across societies throughout the world.

Unsustainable patterns of economic

---

production and consumption promote global warming, environmental degradation and an upsurge in natural disasters. Moreover, while we have strengthened international human rights frameworks over the past several decades, implementing and protecting these norms remains a challenge. These changes signal the emergence of a new global context for learning that has vital implications for education. Rethinking the purpose of education and the organization of learning has never been more urgent. This book is inspired by a humanistic vision of education and development, based on respect for life and human dignity, equal rights, social justice, cultural diversity, international solidarity and shared responsibility for a sustainable future. It proposes that we consider education and knowledge as global common goods, in order to reconcile the purpose and organization of education as a collective societal endeavour in a complex world.

Rethinking education: towards a global common good? University of Chicago Press

The Curse of Capistrano is a 1919 serialized novel by Johnston McCulley and the first work to feature the fictional Californio character Zorro (zorro is the Spanish word for fox). It would be later published as a book in 1924 under the title The Mark of Zorro

This book provides an overview of the recent progress in Francophone tourism geography. It focuses on the theoretical advances in social and cultural geography, whereby the symbolic dimensions of tourism and the creation of tourism worlds are key. It puts forward the tourist conceived as mobile, situated, skilled, reflexive inhabitant of places, which gives all its meaning to the expression “ inhabiting touristic worlds ” . More specifically, this book addresses numerous rarely addressed issues such as the geo-history of tourism, the material cultures of tourists, the digitality and disconnection from digital technologies in National Parcs or the use of knowledge of tourists in metropolises. It gives insights in the specific Francophone approaches such as inhabiting, the urbanity of tourist resorts and the notion of territory in tourist studies. Finally, it provides an overview of the urban dimensions of tourism, place-making in the form of heritage, oasis tourism, sports tourism, production of space in Mexican resorts. As such, the book provides a key read for academics, students and professionals in tourism studies and tourism geography in search for alternative approaches.
