Staff Educator's Guide to Professional Development: Assessing and Enhancing Nurse Competency Corwin

Many educators agree that the 100-point grading model is not always a reliable way

to evaluate student learning. But is there another way to more accurately and equitably grade students and provide high-quality information to parents while fostering student learning? If so, why haven't school districts across the country changed their practices? In *Changing the Grade*, author and educator Jonathan Cornue presents a detailed model for developing a more reliable, standards-based grading system—including 30 steps to guide you through the process. In addition to identifying and addressing

the barriers to change—such as concerns about how colleges and employers will interpret an alternative grading model—Cornue offers a concrete structure for changing the grading system, providing guidance on:

- Thinking in a new way about why grades are given and the purpose of a report card grade;
- Identifying what needs to be changed and what actions must be taken to facilitate the change;
- Building a team of stakeholders—including teachers, principals, and guidance counselors—to lead

the change process; • Developing the new standards-based grading structure; • Designing standards-based assignments and assessments that align with a new grading structure; • Avoiding grade inflation; and • Getting buy-in from teachers and other staff members, principals, administrators, the board of education, and the community by demonstrating that the change process is intentional, research-based, student-focused, and permanent. The book also

includes helpful samples of standards-based gradebooks, homework assignments, rubrics, and report cards. If you are interested in making a systemic and systematic shift to a high-quality grading structure that is far less subjective than many commonly found in schools, consider *Changing the Grade*.

"This is East Texas, and there's lines. Lines you cross, lines you don't cross. That clear?"
New London, Texas. 1937.
Naomi Vargas and Wash Fuller know about the lines

in East Texas as well as anyone. They know the signs that mark them. They know the people who enforce them. But sometimes the attraction between two people is so powerful it breaks through even the most entrenched color lines. And the consequences can be explosive. Ashley Hope Pérez takes the facts of the 1937 New London school explosion—the worst school disaster in American history—as a backdrop for a riveting novel about segregation, love, family,

and the forces that destroy people.
