Janet Lansbury ' s advice on respectful parenting is quoted and shared by millions of readers worldwide. Inspired by the pioneering parenting philosophy of her friend and mentor, Magda Gerber, Janet ' s influential voice encourages parents and child care professionals to perceive babies as unique, capable human beings with natural abilities to learn without being taught; to develop motor and

cognitive skills; communicate; face age appropriate struggles; initiate and direct independent play for extended periods; and much more. Once we are able to view our children in this light, even the most common daily parenting experiences become stimulating opportunities to learn, discover, and to connect with our child.

“Elevating Child Care” is a collection of 30 popular and widely read articles from Janet’s website that focus on some of the most common infant/toddler issues: eating, sleeping,

diaper changes, communication, separation, focus and attention span, creativity, boundaries, and more. Eschewing the quick-fix ‘tips and tricks’ of popular parenting culture, Janet’s insightful philosophy lays the foundation for a closer, more fulfilling parent/child relationship, and children who grow up to be authentic, confident, successful adults.

years of life **Featured in The Wall Street Journal, and seen on Good Morning America, Fox & Friends, and CBS New York** In this important and empowering book, veteran psychoanalyst Erica Komisar explains why a mother's emotional and physical presence in her child's life--especially during the first three years--gives the child a greater chance of growing up emotionally healthy, happy, secure, and resilient. In other words, when it comes to

Compassionate and balanced, and focusing on the emotional health of children and moms alike, this book shows parents how to give their little ones the best chance for developing into healthy and loving adults. Based on more than two decades of clinical work, established psychoanalytic theory, and the most cutting-edge neurobiological research on caregiving, attachment, and brain development,

Being There explains: • How to establish emotional connection with a newborn or young child--regardless of whether you're able to work part-time or stay home • How to ease transitions to minimize stress for your baby or toddler • How to select and train quality childcare • What's true and false about widely held beliefs like "I'm not good with babies" and "I'll make up for it when he's older" • How to recognize and combat feelings of

postpartum depression or boredom • Why three months of maternity leave is not long enough--and how parents can take control of their choices to provide for their family's emotional needs in the first three years Being a new mom isn't easy.
