NFPA 1021, Standard for Fire Officer Professional Qualifications Jones & Bartlett Publishers
The National Fire Protection Association

(NFPA), International Association of Fire Chiefs (IAFC), and International Society of Fire Service Instructors (ISFSI) are pleased to bring you Fire Service Instructor: Principles and Practice, a new text developed to meet and exceed the 2007 Edition of NFPA 1041, Standard for Instructor Professional Qualifications. This text, which utilizes a case-based approach to learning in order to encourage critical thinking, is the core of an integrated teaching and learning system for Fire Instructor I and II level courses. Fire

Service Instructor: Principles and Practice is not only designed to help students meet the requirements to become a fire instructor, but also to empower them to become great educators within the fire and emergency services. Listen to a Podcast with Fire Service Instructor: Principles and Practice editor Forest Reeder to learn more about this training program! Forest discusses the concise nature of the text, its real world focus on how training is delivered in today's classrooms and training grounds, and the

technology resources available to support the text. To listen now, visit: http://d2jw81rkebrcvk.cloudfront.net/assets/multimedia/audio/Fire_Service_Instructor.mp3

A Complete Training Solution for Hazardous Materials Technicians and Incident Commanders! In 1982, the authors Mike Hildebrand and Greg Noll, along with Jimmy Yvorra, first introduced the

concept of the Eight-Step Process© for managing hazardous materials incidents when their highly regarded manual, Hazardous Materials: Managing the Incident was published. Now in its Fourth Edition, this text is widely used by fire fighters, hazmat teams, bomb squads, industrial emergency response teams, and other emergency responders who may manage unplanned hazardous materials incidents. As a result of changing

government regulations and consensus standards, as well as the need for terrorism response training, Mr. Noll and Mr. Hildebrand have modified and refined their process of managing hazmat incidents and added enhanced content, tips, case studies, and detailed charts and tables. The Fourth Edition contains comprehensive content covering: * Hazard assessment and risk evaluation * Identifying the problem and implementing the

response plan * Hazardous materials properties and effects * Identifying and coordinating resources * Decontamination procedures * The Eight-Step Process© * Personal protective equipment selection * Procedures for terminating the incident The Fourth Edition's dynamic features include: * Knowledge and Skills Objectives correlated to the 2013 Edition of NFPA 472, Standard for Competence of Responders to Hazardous

Materials/Weapons of Mass Destruction Incidents* ProBoard Assessment Methodology Matrices for the Hazardous Materials Technician and Hazardous Materials Incident Commander levels * Correlation matrix to the National Fire Academy's Fire and Emergency Services Higher Education (FESHE) Bachelor's (Non- Core) Managerial Issues in Hazardous Materials Course Objectives * Realistic, detailed case

Experience Navigate 2 today at www.jblnavigate.com/2. A fire fighter's ability to recognize an incident involving hazardous materials or weapons of mass destruction (WMD) is critical. They must possess the knowledge required to identify the presence of hazardous materials and WMD, and have an understanding of what their role is within the response plan. The second edition of Hazardous Materials Awareness and

Operations will provide fire fighters and first responders with these skills and enable them to keep themselves and others safe while mitigating these potentially deadly incidents. Hazardous Materials Awareness and Operations, Second Edition meets and exceeds the requirements for first responders within the 2013 Edition of NFPA 472, Standard for Competence of Responders to Hazardous Materials/Weapons of

Mass Destruction Incidents. Additionally, the material presented also exceeds the hazardous materials response requirements of the Occupational Safety and Health Administration (OSHA) and the Environmental Protection Agency (EPA). Hazardous Materials Awareness and Operations provides in-depth coverage of: - The properties and effects of hazardous materials and WMDs - How to calculate potential danger and

initiate a response plan - Selection, use, advantages, and disadvantages of personal protective equipment - Mass and technical decontamination - Evidence preservation and sampling - Product control - Victim rescue and recovery - Air monitoring and sampling - Illicit laboratory incidents

The second edition features: - A new chapter on Fire Smoke designed to teach hazardous materials responders how to prevent, protect,

detect, diagnose, and appropriately treat smoke inhalation. - Knowledge and Skills Objectives correlated to the 2013 Edition of NFPA 472, Standard for Competence of Responders to Hazardous Materials/Weapons of Mass Destruction Incidents. - Detailed step-by-step skill drills with which include the corresponding NFPA job performance requirement. - Scenario based learning tools including You are the Responder,

The CMC Rope Rescue

Technician Manual is the standard text for many fire departments, rescue teams and training programs across the country. The sixth edition reflects the latest advances in technology, equipment and procedures available to rescue professionals. Its concise style clearly sequences and describes the elements of rope rescue in a way that is both detailed and easy to understand.

Well-drawn diagrams depict each recommended stage of rope rescue operations. The result is a very useful tool for rescue professionals at every skill level. CMC has been an innovator in the emergency services industry for over 40 years. In 1978 Jim Frank endeavored to make rescue safer and more efficient by founding California Mountain Company (later CMC Rescue, now all rope technicians

CMC), a company that sourced and supplied specialized life safety equipment to the rescue community. Today, CMC is a globally recognized, employee-owned company that proudly manufactures many products in our ISO-certified Santa Barbara facility, and provides specialized education and training for rescue and rope access professionals. CMC recommends that

seek qualified, hands-on instruction from a trusted source. The CMC School provides this type of training with a focus on learning-by-doing. Open enrollment and custom courses are available worldwide. For more information on CMC or the CMC School, visit cmcpro.com.
